# OPPS Adolescent Mental Health Consumers

### **Matched Initial/Update Report**

This feedback report is available to Local Management Entities, providers and the NC Division of Mental Health, Developmental Disabilities and Substance Abuse Services on data gathered for mental health consumers through the North Carolina Treatment Outcomes and Program Performance System (NC-TOPPS). This report provides information gathered through the online NC-TOPPS Initial and Update (or Episode Completion) Interviews. It provides six or seven pages of charts, tables and text information on consumers' demographic characteristics, symptoms, behaviors and activities, service needs, supports and barriers, family and housing issues and outcome measures collected through an interview with the consumer during treatment. It should be noted that not every data element or response category on the NC-TOPPS Interviews are displayed in this report.

Please note that the charts and tables may not always match online queries that you may conduct. The data used in these reports will not necessarily reflect the same points in time. In addition, NDRI who produces these reports cleans the data and removes apparent duplicates prior to preparing the tables and charts.

Additional information about NC-TOPPS and pdf copies of the online NC-TOPPS interviews are located at: <a href="http://nctopps.ncdmh.net/">http://nctopps.ncdmh.net/</a>

### **General Information on Interpreting Tables**

#### **Types of Statistics**

- A <u>count</u> shows the actual number (often designated by the letter "n") of clients.
- ► A <u>percentage</u> is the number of clients with a characteristic or behavior divided by all the clients in the group of interest multiplied by 100. Percentages will be designated with a % sign next to the number.
- ► An <u>average</u> is the sum of a set of numbers divided by the number of numbers in the set. When a number in a cell is an average, the word average will appear in the row descriptor.
- ▶ A <u>median</u> is the middle number in a set of numbers, arranged from lowest to highest. For example, the median for the following numbers: 9, 12, 12, 15, 17, 20, 22, 23, 25, 28, 31, 35, 62 is the bolded number, 22. Medians are important measures of central tendency, especially when a mean may be skewed by a very high or very low value. When a number in a cell is a median, the word median will appear in the row descriptor.

#### **Missing Data**

For many of the NC-TOPPS forms received, a particular item or question may have been left blank. In calculating the means, medians, and percentages in cells of questionnaire items, this missing data is excluded from the calculation. For example, program X may have submitted 50 assessments but in 2 of the assessments, gender was left blank. When the percent of males is calculated, the 25 males are shown as 52% (25/48\*100).

### Denominator

The denominator for nearly all percentages is the number of cases shown on the bottom left of the page minus item missing data. All exceptions to this general rule are **specifically noted** with appropriate text in the graphic or table. This text will state which group is included or excluded from the denominator, such as "of those in the labor force" or "of those with children."

### Multiple Response

"Multiple response" indicates a "mark all that apply" type question in which more than one response to a question is allowed. The total of responses may add to greater than 100%. Examples are health insurance or target population. This is in contrast to items such as gender where only a single response is allowed.

# Time periods of behaviors measured

Behaviors are measured at several time periods including the past year, the past 6-months, the past 3-months, the past month, or since last interview. For the Initial Interviews, the time periods can generally be construed to mean the time period before treatment begins. For the Update Interviews the time is measured from the time at which the interview occurs back one month, 3-months, or since the last interview.

### **Definitions of terms**

The Appendix at the end of the report gives definitions of acronymns, abbreviations, and other terms used in this report

#### **Notes:**

Mental Health consumers who are also being treated for substance abuse (co-occuring) are included in this report.

This table shows the number of matched consumers in this report by provider. This is the number of Initials done during the calendar year 2006 for whom there was a 3-month update interview conducted by June 30, 2007.

Provider	City	ProviderID	Number
Alexander Youth Network	Charlotte	294	11
CNC/Access	Charlotte	1351	1
Easterseals UCP	Charlotte	1336	1
Family Preservation Services	Charlotte	295	48
HomeCare Management Corporation	Charlotte	1187	1
Keys of Carolina / Keystone Charlotte	Charlotte	1030	6
Mecklenburg PSO Child and Adolescent Services	Charlotte	85	71
Melange Health Solutions	Charlotte	925	5
Professional Care Management	Charlotte	371	18
The Arc of North Carolina	Charlotte	1069	1
The Family Center	Charlotte	694	6
Vision Healthcare Provider Services	Charlotte	1645	1
Total			170

# Part I

Part I of this report includes descriptive information about the Initial Interviews Matched to 3-Month Interviews consumers. This information on the types of consumers, time in treatment, types of services needed and being rendered helps in understanding the behavioral changes shown in Part II and Part III of this report.

#### 1-1: Days Between Initial and Update Interview

#### 1-2: Gender

Among Mecklenburg consumers, 61% are male, and 39% are female.

### 1-3: Race/Ethnicity

#### 1-4: Hispanic

4% of Mecklenburg consumers are Hispanic.

#### 1-5: Age Group

### 1-6: Gender and Age

# 2-1: Gender and Ethnicity

# 2-2: IPRS Target Populations at Update

### 2-3: Special Populations at Update

### 2-4: Special Programs at Update

Note: See appendix for definitions of acronyms used on this page.

# 3-1: Services Needed and Received

This chart compares information from the Initial Interview about whether a service area is very important to information from the Update Interview about whether the service was received during treatment.

# 3-2: DSM-IV Diagnoses at Update

Diagnostic Category	
ADD	28%
Oppositional defiant disorder	55%
Major depression	19%
Conduct disorder	16%
Disruptive behavior	9%
Bipolar disorder	8%
PTSD	6%
Anxiety disorder	2%
Drug abuse	12%

Only most common diagnoses shown. Multiple response

# 3-3: Attendance at Scheduled Treatment Sessions, During Treatment Since Last Interview

# **3-4:** Family Involvement with Treatment Services and Person-Centered Planning Since the Last Interview

Family Involvement with	
Services and/or planning	99%
Treatment Services	94%
Person-centered planning	89%

# Part II

Charts and Graphs 4-2 thru 5-9 show consumers' daily activities, living situtation, substance use, and arrests. Some graphs and tables compare information collected at the Initial with information collected in the Update. Initial information is designed to be collected by means of a personal interview with the consumer. The preferred method for completing the Update items in this section is a personal interview; however, a telephone interview, clinical records, and/or notes can also be used. The following chart shows how it was completed for the current group of consumers:

#### 4-1 Update Data Collection Method

# 4-2: How Often Problems Interfere with Work, School, or Other Daily Activities

#### 4-3: Enrollment in Academic Program

Enrolled in	Initial Interview	Update Interview
Any academic program	86%	91%
Academic School (K-12)	67%	71%
Alternative Learning Program(ALP)	21%	18%
Technical or Vocational School	0%	0%
GED	1%	2%

# 4-4: Students in K-12 who Received Mostly A's, B's, and C's at Most Recent Grading Period

	Initial	Update
Of those in K-12	Interview	Interview
Received mostly A's, B's, and C's	55%	58%

### 4-5: School Expulsion, Suspension and Truancy

Of those enrolled in K-12 who missed school due to	3-months before tx	Since last interview
Expulsion	1%	3%
Suspension	53%	43%
Truancy	21%	17%

#### 4-6: Justice System Involvement

7% of Mecklenburg consumers were under adult correctional supervision and 32% were under the juvenile correctional supervision at the time of the Update Interview.

#### 4-7: Arrested or In Trouble with the Law

	6-months before tx	Past Month or since last interv.
In trouble with the law	39%	21%
Any arrest	18%	6%
Misdemeanor arrest	17%	4%
Felony arrest	4%	2%

Note: Time period for Update changed from since last interview to past month

#### 4-8: Carried Weapon Such as Knife or Gun

		During tx
	3-months	since last
	before tx	interview
Carried knife or gun	14%	7%

# 5-1: Where Lived

# 5-2: Number Living in Special Circumstances

Where lived most of time	3 Months before Tx	Since last interview
Homeless sheltered	1	0
Homeless unsheltered	0	0
Foster home	19	8
Therapeutic foster home	4	10
Level III Group Home	27	41
Level IV Group Home	8	12
Halfway house	0	0
State residential treatment center	3	3
SA residential treatment facility	0	0
Psychiatric residential treatment facility	2	1
Total living in special circumstances	64	75
Of the total, number in home community	29	41

### 5-3: Have Own Children

3% of Mecklenburg consumers have children of their own.

#### 5-4: Times Moved Residences Since Last Interview

None	65%
Once	31%
More than once	4%

### 5-5: Substance Use

# 5-6: Cigarette Smoking

	Month	Month
	before tx	during tx
Smoke cigarettes	12%	11%
Smoke a pack a day or more	1%	0%

# Part III

Charts and Graphs 6-1 thru 7-3 compare Initial Interview information with information from Section III of the Update Interview. Section III has questions that must be answered by the consumer. If the consumer is not available, these items are skipped and left blank. Therefore, these items often represent the responses of fewer consumers.

\* 117 of the 170 (69%) of Mecklenburg Update Interviews included a personal interview with the consumer.

# 6-1: Severity of Mental Health Symptoms

# 6-2: Psychotropic Medications at Update

56% of Mecklenburg consumers have a current prescription for psychotropic medications. Of those, 92% take their medication as prescribed all or most of the time.

### 6-3: Experienced Violence

	3 Months before tx	During tx, since last interview
Physical violence	33%	15%
Sexual violence	0%	0%

# 6-4: Behavior Problems and Symptoms

	During tx, 3 Months since last before tx interview	
Suicidal thoughts	26%	14%
Tried to hurt or cause self pain	13%	12%
Risky Sexual activity	6%	3%
Hit/physically hurt another person	61%	23%

### 6-5: Consumer Participation in Positive Activities

#### 6-6: Public or Private Health Care Provider

Of the Mecklenburg consumers, 97% have an identified primary health care provider and 92% have seen their provider in the past year.

#### 7-1: Health Care Received

# 7-2: Consumer Ratings on Quality of Life

# 7-3: Helpfulness of Program Services (of those for whom the service is applicable)
